EDUCATION

Rajasthan Technical University, Kota

Degree in Master of Computer Application

Jaipur, Rajasthan

Dec 2020 - Oct 2022

S S Jain Subodh P.G. College

Degree in Bachelor of Computer Application

Jaipur, Rajasthan

Aug 2017 - Nov 2020

EXPERIENCE

Rampwin Technology | Software Developer

Jaipur, Rajasthan | Aug 2024 - May 2025

- Developed high-performance RESTful web services to facilitate smooth communication b/w different components of the application.
- Evaluated and developed new tools and technologies to help achieve company-level goals.
- Integrated third-party APIs into existing systems to extend product capabilities without reinventing the wheel.
- Troubleshoot and resolved performance issues for databases and software.

Wiseapp | Software Engineer

Jaipur, Rajasthan | May 2022 - Aug 2024

- Developed and maintained scalable RESTful APIs using .NET Core Web API, enhancing backend performance and modularity.
- Developed reusable components that significantly reduced dev. effort on multiple projects.
- Implemented effective debugging strategies, resulting in fewer software defects and increased reliability.
- Developed dynamic web apps using Angular, ensuring seamless user interaction.
- Integrated REST APIs with Angular services to enable real-time data communication with backend systems.
- Optimized frontend performance through efficient change detection & on-demand component rendering.
- Implemented robust client-side form validation and handled complex form logics.
- Incorporated advanced Angular features like custom directives and services to create dynamic web applications that met client requirements effectively.
- Ensured seamless deployment of Angular applications by coordinating with IT operations team on server configurations and release management activities.

SKILLS

Programming Languages: C#, TypeScript, JavaScript

Libraries/Frameworks: .Net Core, Nest JS, Angular, Bootstrap

Tools / Platforms: Git, VS Code, Postman, .NET CLI, Swagger, npm, Github, Bitbucket

Databases: MS SQL Server

PROJECTS / OPEN-SOURCE

GoGo Motor

.Net Core Web API, NestJS,MS SQL

- Fixed bugs and enhanced existing modules in a vehicle service booking/selling platform.
- Developed and optimized stored procedures in SQL Server for better data handling and performance.
- Integrated multiple third-party APIs for services like location, notifications, and payments.
- Participated in migration of APIs from .NET Core to NestJS, ensuring consistent functionality.

Refreshment PWA Application

.Net Core Web API, Angular, MS SQL

- Built a Progressive Web App (PWA) to enable pantry item ordering via QR code scanning placed at pantry locations.
- Implemented secure and intuitive ordering flow allowing users to browse menu, place orders, and view past order history.
- Enabled automatic redirection to the PWA upon scanning the QR code using device camera or scanner apps.
- Designed responsive UI to ensure smooth performance on both mobile and desktop devices.

Timer PWA Application

.Net Core Web API, Angular, MS SQL

- Developed a Progressive Web App (PWA) to track and display countdown timers for scheduled meetings.
- Implemented real-time reverse countdown logic that starts automatically at meeting begin time.
- Added a pre-end alert system to trigger audio alarms 10 minutes before meeting ends using browser APIs.

Wise Queue (Queue management solutions)

.Net Core Web API, Angular, MS SQL

- Developed a queue token system, allowing for efficient management and tracking of visitor queues & tokens.
- Developed and implemented gate functionality, facilitating seamless visitor entry and exit management while enhancing security and operational efficiency.

Wise Meetings (Meeting room management solutions)

.Net Core Web API, Angular, MS SQL

- Developed a translation functionality, providing multilingual support.
- Developed a PWA for meeting rooms, featuring a timer function to manage meeting durations and integrated refreshment ordering for seamless meeting experiences.
- Developed a pantry PWA for the company, enabling users to place, track and cancel orders via QR code scanning, enhancing convenience and efficiency.
- Implemented the room category module, allowing categorisation and organisation of meeting rooms.

Wise Visits (Visitor management solutions)

.Net Core Web API, Angular, MS SQL

- Implemented the visitor photo capture module, allowing seamless capturing and storage of visitor photos during check-in on premises.
- Integrated the emirated id scanning functionality into the system, enabling efficient identification and verification of visitors upon check-in.
- Implemented data retrieval and visitor check-in using Aadhar card details, ensuring accurate and quick visitor registration process.

CERTIFICATIONS

- Back End Development and APIs - **freeCodeCamp**
- Deloitte Australia - Data Analytics Job Simulation - **Forge**
- JavaScript Certification - **Sololearn**
